PROFESSIONAL SUMMARY

Full Stack developer with a passion for problem solving, building and learning. Experienced in Ruby on Rails and JavaScript based programming. Thrive in fast paced environments that require constant learning and growing. Possess strong skills in communication, teamwork, and learning on the fly.

TECHNICAL SKILLS

React, Redux, Rails, Javascript, Ruby, Sinatra, SQL, HTML, CSS, Git

TECHNICAL PROJECTS

Cleans - [Github](#) | [Demo](#)

This app helps people find a person to clean their living space, and it helps people find cleaning jobs.

- Developed a Rails API backend from scratch with restful endpoints for users, reviews, jobs, addresses, and job applications.
- Built a rating and reviews system to facilitate hiring decisions for cleaning jobs.
- Utilized React to build an interactive frontend.
- Utilized Redux to create a global state and ease the process of passing props down to child components.
- Implemented user interface with bootstrap and CSS.
- Utilized Redux thunk middleware to tell the state that something is loading before making a fetch request.

ChoreMates - [Github](#) | [Demo](#)

This helps you organize chores and distribute between people in a household.

- Developed a Rails API backend from scratch with restful endpoints for houses, house members, rules and chores.
- Utilized vanilla Javascript to build an interactive frontend.
- Implemented websockets to have real time updates in multiple devices.
- Implemented user interface with bootstrap and CSS.

Workout Buddy - [Github](#) | [Demo](#)

This app enables you to create and share workout plans, and also create your own schedule.

- Built it on Ruby on Rails to handle both the backend and frontend.
- Implemented login feature with validations to store user data.
- Implemented omniauth login verification with google.
- Utilized scope methods to add filter features.
- Utilized Bootstrap and CSS to style user interface.

EXPERIENCE

RG Select Naturals, LLC

Laboratory Technician

Eugene, OR

Mar/2019 - Sep/2019
